

Day 1 Lab Assignments

- Design the following sample home page using the following main layout for Desktop (and make sure that it's completely **responsive**):
 - You can use your old home page layout (In JS labs or html labs) instead of the following image if you like)
 - Pay more attention for layout, not of the content.
 - Make your page fully responsive (use viewport meta tag).
 - **DON'T** use tables in you layout, use divs & spans (or new HTML 5 structural elements), with CSS instead.
 - **Use flexbox instead of floating.**
 - Try flex wrap properties, to make sure that the columns will appear below each other in the small size.
 - Make your images, Videos responsive.
 - **Don't** use media queries, use the default action of flex box (The left bar its size will only decrease on its place).

- Use Media query and CSS breakpoints in your website layout on normal laptops and PCs, tablets and smart phones (as shown in the prev. image):
 - You can use your old home page layout (In JS labs or html labs) instead of the following image if you like)
 - Design the tablet view, and hide the left column on tablet size and make the middle part fill the width. (Use media queries on CSS file and breakpoints).
 - When you hide the left column, make it appear as row (width 100%) above or below (as shown in above image for tablet view).
 - Design the mobile view hide banner image and left column (Use media queries on CSS file and breakpoints).

- Use grid layout with your CV page design, and make sure that it's completely responsive (use viewport meta tag):
 - Change the middle content in the given image to be full-page width.
 - Use 16 columns layout.
 - Set box-sizing property.
 - Use Viewport units with the font size for text in the header (Name), and max-width with the image.
 - Use float property or flexbox.
 - Use **flex** instead of float (**Bonus**).
 - What are the differences between custom grid layout, and CSS display: grid?(**Bonus**).
 - Use CSS grid, instead of Custom grid (**Bonus**).(https://www.w3schools.com/css/css_grid.asp).
 - Change the header image in tablet and mobile view (Use picture tag).

PERSONAL ASSISTANT

ASSISTING IN DAILY BUSINESS AND PERSONAL TASKS
